

PROVIDING ENERGY
PRICE CERTAINTY,
SO YOU CAN
FOCUS ON YOUR
CORE BUSINESS.

myrateenergy 

Energy might not be your primary business, but it can be one of your business' biggest costs.

PEACE OF MIND BUDGET CERTAINTY

Natural gas and electricity costs can be a big part of your operating budget. These commodities are traded in the open or 'spot' market and can be very volatile. As the person responsible for the operation or financial management of your business, you can't afford to have increasingly volatile energy prices compromise your budget. Our commodity risk management products can help you manage this uncertainty.

CUSTOMIZED PLANS FOR ANY SIZE BUSINESS

Whether you are a large or small manufacturer, property manager, retailer, institutional or service provider, energy costs make up a significant portion of your annual budget. These unpredictable costs can be controlled with a customized energy plan tailored to how you use energy. Our customized solutions can help you fix these costs for all or part of your energy consumption, for terms ranging up to 5 years.

FLEXIBLE TRANSPARENT PRODUCTS

Our flexible energy hedging programs offer:

- Budget certainty - fix your commodity costs at competitive rates for a defined period of time
- Load balancing – our products can be designed to minimize or completely avoid costly balancing charges with no minimum or maximum usage requirements and no true-ups
- Blend & Extend and Flexible Forward Start Dates – take advantage of changes in future market prices by adding on to your existing agreement
- Billing – continue to receive your bill from your current utility; no additional credit checks or collateral required
- Professional sales advice – our dedicated account executives provide you with the objective advice you expect from a trusted supplier

ENVIRONMENTAL SOLUTIONS FOR GREEN-MINDED BUSINESSES

MyRate Energy can provide you with CSA-approved and registered carbon credits from programs sourced entirely in Canada. The purchase of carbon credits demonstrates to your customers and your employees that your company is committed to a cleaner environment.

ABOUT US

MyRate Energy is a leading Canadian-owned energy marketer, we are dedicated to the needs of business energy consumers. Our management and portfolio teams have years of experience in energy markets across North America and will work with you to meet your natural gas and electricity needs. Established relationships with our suppliers give us access to some of the best pricing in the market. Whether you are looking for a short-term solution to provide rate stability or you are looking for a strategy to manage rising long-term market prices, MyRate Energy can help put together the right program for you.
